

Quick Start

Oklahoma Scoring Service welcomes the North Carolina GED Examiners!
Let's get you ready to use the Oklahoma Scoring Service.

This quick start has three parts:

1. Install the VPN
2. Adjust your NC WS_FTP software
3. Access the OSS web site

Install the VPN

Pick the computer you currently use with your Scantron ES 2260.
Use the CD and the instructions Kathy gave you.

Just a reminder:

The user name is: nc
The password is: orange128

Adjust the FTP

Click and open the WS_FTP Icon (this is the one you normally use for sending tests to be scored)
On the Session Profile screen click "New"

Type NC in the Profile Name

Type 172.17.8.7 in the Host Name

Choose Automatic detect in the Host Type

The User ID field requires you to know the last four digits of your test center number

Your test center number starts with 3000 and has 10 digits. To complete the User ID field, you will need to type nc and right after the c type the last four digits of your test center number.

For example if your test center number is 3000360730, then you would enter nc0730.

So....

Type nc plus the last 4 digits in the User ID

Type orange128 in the Password

Check the "Save Password" box

Click on "Save"

You're done!

Access OSS

Connect to the VPN

Open your browser

Enter <http://172.17.8.5>

Click "logon"

Type cc58 in the user name

Type tarheels in the password

**Thank you, and have a wonderful day.
Call Eric if you need help 1.888.261.4729**
