

July 20, 1998

**MEMORANDUM**

TO: Presidents

FROM: H. Martin Lancaster

SUBJECT: Information Systems Technology and Concentrations Curriculum Standards Revision

I am delighted to inform you that on July 17, 1998, the State Board approved a revision to the A25260 Information Systems and concentration standards effective Fall semester 1998. The revision adds CIS 282 Networking Technology to the choices for satisfying the Networking subject area under the core. The revision also includes removing two courses (CIS 173 Network Theory and CIS 282 Network Technology) from A2526D Network Administration and Support to reduce content duplication in this concentration. CIS 173 will remain in the Common Course Library for those colleges that desire to use it. The revised standards are attached.

We wish you continued success with these programs.
