

January 12, 1999

**MEMORANDUM**

**TO:** Presidents

**FROM:** Brenda H. Rogers  
Vice President for Administration

**SUBJECT:** Telephone System

I received information from the State Purchase and Contract Division about a telephone system that a firm is willing to donate to a State agency, school, or college. Please see the following description sent by the Purchase and Contract Division and contact Elaine Perkins directly if your college is interested in the system:

An architectural firm in Charlotte has recently replaced its telephone system and is willing to donate it to a state agency. The system is an Executone system equipped for 10 business lines with 36 telephones and an attendant's console. A voice mail system was added in 1997 and comes with the telephone system. The contact at the firm is Elaine Perkins and her number is 704-372-2740. The system works well. Her firm only replaced it to gain a few other capabilities. She needs for someone to come and get it if he or she wants it. She is very anxious to have the system removed as it is taking up office space. Executone has an office in Raleigh in case a prospective taker wants to find out the cost to have it installed. It is a free phone system in very good condition with a fairly new voice mail system as a bonus. Timing is important!
