

NORTH CAROLINA COMMUNITY COLLEGE SYSTEM
H. Martin Lancaster, President

To: Presidents

From: Steve Ijames, Director
Information Services

Subject: 1999-00 College Staff Information Reports and Average Salary Studies

Date: February 11, 2000

The enclosed 1999-00 reports and average salary studies have been compiled from data provided by your college via electronic transmission. (Reference: College Staff Information Data Form, DCC 7-8.) The reports and summary tables are limited to full-time staff employed for nine months or more during the 1999-2000 fiscal year.

Note that you are receiving two sets of reports. One set contains summary information for the entire community college system, and the other set contains information specific to your college.

The method of computing average salary data has changed from the FTE method used in prior years to a standard average method. This method utilizes the employee's state salary as a whole position when calculating the average state salary for a college instead of prorating the position between state and other funds as was done under the FTE method.

Please call me or Mei-Shin Ju at (919) 733-7051, ext. 358, if you have questions regarding the information provided.
