

**NORTH CAROLINA COMMUNITY COLLEGE SYSTEM**  
*H. Martin Lancaster, President*

March 16, 2004

**Response Deadline: March 31, 2004**

**M E M O R A N D U M**

**TO:** Presidents  
Chief Academic Officers  
Distance Learning Administrators

**FROM:** Darryl McGraw, Associate Vice President  
Instructional Development and Technology

**SUBJECT:** *SAS inSchool* Evaluation Project

The Cary-based SAS corporation has developed a new product called *SAS inSchool*<sup>®</sup> that provides competency-based content in certain academic areas. Specifically, English, Spanish, science, mathematics, and social studies are topics that have been developed by SAS for use in the K-12 area.

We would like to put together an evaluation team to determine if these materials are applicable to either our remedial education efforts, or as additional resource materials for curriculum or continuing education classes, especially distance-delivered classes. We are currently seeking faculty members to serve on an ad-hoc evaluation team to evaluate some of the *SAS inSchool* materials. We anticipate one meeting via the North Carolina Information Highway with evaluations being done from your community college.

Please forward this message to faculty members whom you think may be interested in serving on this evaluation team. To serve, an interested person need only to contact Ms. Alice Holt at (919) 807-7112 or e-mail [holta@ncccs.cc.nc.us](mailto:holta@ncccs.cc.nc.us). We ask that interested faculty members contact us by Wednesday, March 31<sup>st</sup> so that evaluation may commence by Monday, April 5<sup>th</sup>.

For more information on the *SAS inSchool* product, please visit <http://www.sasinschool.com/software/pathways/index.shtml> or call Dr. Darryl McGraw at (919) 807-7108.

Thank you for your involvement in this project.
