Memorandum

IMPORTANT INFORMATION

TO: Presidents
Chief Academic Officers

FROM: Fred G. Williams, Executive Vice President & Chief Operating Officer

SUBJECT: Homeland Security Training

Last fall, the Division of Crime Control and Public Safety approached the System Office with a proposal to provide funds for the improvement of the Emergency Preparedness curriculum. Six of our colleges offer this program and at the request of the Division of Crime Control and Public Safety, Durham Tech has agreed to coordinate this effort with representation from the other colleges approved to offer the program.

Although this is technically not a Curriculum Improvement Project, Durham Tech will follow the CIP model to the fullest extent possible in carrying out this initiative. This effort has the endorsement of System Office.

Let me assure you Durham Tech wants to ensure everyone that the good relationship they have with all colleges remains and that their hosting this initiative is for all our colleges. Please contact William G. Ingram, Senior Vice President/Chief Instructional Officer at Durham Tech if you have any questions about this initiative.
