*H. Martin Lancaster, President*

**MEMO**

DATE: February 3, 2000

TO: LRC Directors  
Community Colleges Participating in CCLINC

FROM: Ruth Bryan

SUBJECT: Equipment Survey

As part of the planning process for migration to a new integrated library system, we need information about hardware and software products used by your library to access the current CCLINC library system. This information is essential to good planning. We will share the information with SIRSI. We want to make sure that we understand exactly what your current and projected situations are so that we can work to provide the best possible solutions for all CCLINC libraries.

If you have questions or concerns about other equipment and software not addressed in this survey, please list them on a separate sheet and return them with your survey response.

Please fill out the enclosed survey form and return to me as soon as you can, but not later than February 15, 2000.

## CCLINC LIBRARIES EQUIPMENT SURVEY

College \_\_\_\_\_

Contact Person: \_\_\_\_\_

Please answer the following questions. (Do not include any PCs running Windows 3.1 in your answers.)

1. How many *Internet-accessible networked PCs with at least a Pentium 166mHZ processor and 32 MB of RAM running Windows 95 or 64 MB of RAM running Windows NT* do you anticipate having by July 1, 2000?

Staff use \_\_\_\_\_ Public use in library \_\_\_\_\_ Public use outside library \_\_\_\_\_  
(e.g., instructional labs, faculty offices)

2. How many other, less powerful Internet-accessible networked PCs running Windows 95 do you currently have?

Staff use \_\_\_\_\_ Public use in library \_\_\_\_\_ Public use outside library \_\_\_\_\_

- 3a. How many terminals do you anticipate using for system access after July 1, 2000?

Staff use \_\_\_\_\_ \* Public use in library \_\_\_\_\_ Public use outside library \_\_\_\_\_

\*Please specify:

Circulation	Acquisitions
Cataloging	Public Access

- 3b. What kind of terminals will you be using after July 1, 2000, and how many of each?  
(e.g., Wyse 50) SIRSI supports the following dumb terminals: IBM 3151 or 3153, Wyse 30, 50, 60, or 325 color terminal, and DEC VT100 or VT220.

Type \_\_\_\_\_ Staff use \_\_\_\_\_ Public/outside \_\_\_\_\_

Type \_\_\_\_\_ Staff use \_\_\_\_\_ Public/outside \_\_\_\_\_

4. What type of peripherals are used with the above PCs or Terminals? (Please be specific with model number and brand)
- Lightpens/barcode scanners
  - Servers (i.e., terminal servers, print servers)
  - Printers
  - Telxons

5. Please list any specialized software used to access the CCLINC system. (e.g. ANZIO Lite)

**Please return this survey no later than February 15, 2000 to:**
