

NORTH CAROLINA COMMUNITY COLLEGE SYSTEM
H. Martin Lancaster, President

MEMORANDUM

TO: Selected Presidents

FROM: Parks Todd
Director, Telecommunication Services

DATE: June 21, 2000

SUBJECT: Joint Statement of No Objection, ITFS Applications

It is imperative that presidents of colleges that have ITFS licenses pending sign a **Joint Statement of No Objection**. This statement, in essence, says that if your signal causes interference with a neighboring site or that site causes interference to you, both or all parties will cooperate to eliminate or reduce the interference to what the document calls "non-material levels." This is really a problem for engineers.

Please initial the first page of the **Statement**, and sign and date the page on which your college is printed.

Return the originals of those two pages to WONC's legal counsel by Monday, June 26:

Ms. Robyn Nietert
Brown, Nietert, & Kaufman
1920 N Street, N. W., Suite 660
Washington, D.C. 20036

Time is critical, so please handle this on a high priority basis.

Thanks!

Joint Statement of No Objection to Pending ITFS Applications In North Carolina and Gaffney, South Carolina

The undersigned educational institutions are applicants for new or modified ITFS facilities on the channel groups and in the markets set forth below in North and South Carolina. (“Joint Applicants”). All of the Joint Applicants have entered agreements to lease excess capacity on their proposed ITFS facilities to Wireless One of North Carolina, LLC (“WONC”), except as otherwise noted below.

The Joint Applicants have co-channel and adjacent channel ITFS proposals pending before the Federal Communications Commission in the markets noted below. The Joint Applicants have reviewed the proposals set forth in each others= pending applications, for the file numbers listed below, and believe that their respective proposed facilities can be operated in a coordinated manner, as do WONC and the other commercial lessors. Therefore, the Joint Applicants hereby state that they have no objection to the grant of any pending ITFS applications for the file numbers noted below. If a Joint Applicant receives materially objectionable levels of interference to its transmissions on any channels for which it is licensed in its PSA from any other Joint Applicant=s facilities, as proposed in that Joint Applicant=s pending ITFS application, then all Joint Applicants which are parties to this Joint Statement of No Objection will cooperate in the reduction of such interference to non-material levels, at the sole cost and expense of the Joint Applicant causing the interference.

It is understood that this Joint Statement of no Objection may be filed as part of the applications described within.
