

STATE BOARD OF COMMUNITY COLLEGES

CURRICULUM PROGRAM APPLICATION

(New-to-the-System Program)

(Revised 3/19/09)

The State Board will be asked to approve the new-to-the-system curriculum program at the college listed on the condition that equipment funds are available to the college and operating funds generated by the budget formula will permit the offering of this program without any special allocation of funds.

**Central Piedmont Community College
Sustainability Technologies (A40xxx)**

Note: Revisions were made following the March 20, 2009 State Board meeting where this item was presented and approved for “Future Action.”

The course title and description of **SST 140 Green Building Design** were changed as follows:

- **Title changed to “Green Building Concepts”**
This change was made at the suggestion of the State Board Program Services Committee, with subsequent concurrence by the college.
- **The reference to “Leadership in Energy and Environmental Design (LEED)” was changed to “LEED® (Leadership in Energy and Environmental Design)”**
This change was made to comply with logo guidelines published by the U.S. Green Building Council, the organization that administers this certification program.

As a result, these changes have been incorporated into the attached Sustainability Technologies (A40xxx) curriculum standard and Sustainability Technologies (SST) course list.
