

CURRICULUM STANDARD REVISION

**Stanly Community College
Biomedical Equipment Technology (A50100)**

Stanly Community College is seeking approval to revise the Biomedical Equipment Technology (A50100) curriculum standard, effective Summer 2011.

The proposed revision follows:

- Remove ELN 133A from the core of the Biomedical Equipment Technology (A50100) curriculum standard

** Please note that the proposed curriculum standard also includes the revised course BMT 111 (Intro to Biomed Field) which was approved by the Curriculum Review Committee on September 28, 2010.*

Rationale of Requesting College: Lab exercises in ELN 133 (Digital Electronics) are sufficient for student success in the biomedical equipment industry.

Two colleges are approved to offer the program. Stanly Community College and Caldwell Community College and Technical Institute are both in favor of the revision.

Coordinator: Mr. Frank Sculetta, Engineering and Technology
