

CURRICULUM STANDARD REVISION

**Asheville-Buncombe Technical Community College
Computer-Aided Drafting Technology (A50150)**

Asheville-Buncombe Technical Community College (ABTCC) is seeking approval to revise the Computer-Aided Drafting Technology (A50150) curriculum standard, effective Summer 2011.

The proposed revision follows:

- Remove DFT 251 Customizing CAD Software from the core of the program standard
- Reduce the core hours from 17-18 SHC to 14-15 SHC

Rationale of Requesting College: Computer-Aided Drafting (CAD) software has evolved to the point where the customization topics included in DFT 251 Customizing CAD are obsolete.

ABTCC is the only college approved to offer the program.

Coordinator: Mr. Frank Sculetta, Industrial Technologies Programs
