### **Statement from Dr. R. Scott Ralls, President of the NC Community College System, on the 2009-11 State Budget:**

“While several of the budget reductions will be difficult for our colleges to sustain as they face record enrollments, we are very appreciative of the support shown to community colleges by the General Assembly and the Governor, especially in these economic times. Their efforts respond to our technology needs and bolster our healthcare and technical education programs, demonstrating strong support for our students, our colleges and North Carolina’s economic recovery.”
