**CURRICULUM STANDARD**

**Curriculum Program Title**
Aerostructure Manufacturing and Repair Technology
(Not applicable)

**Program Code**
A50450

**CIP Code**
15.0801

---

**Curriculum Description**

The Aerostructure Manufacturing and Repair Technology curriculum prepares individuals to assemble, fabricate, inspect, manufacture, repair, test and manage the construction of aerostructures in an industrial setting.

Coursework includes materials, production procedures, planning, costing, plant layout, software, quality control, aviation standards and aerostructure assemblies. Emphasis will be placed on aerostructure construction techniques, manufacturing processes, composite manufacturing and repair, and computer numerical control (CNC) machining processes.

Graduates should qualify for employment in aerostructure manufacturing and other similar industries as project assembly and repair technicians, quality testers and inspectors, tooling technicians, composite specialists, fabricators, CNC machinists, project managers and computer-aided design (CAD) technicians.

---

**Curriculum Requirements**

*For associate degree, diploma, and certificate programs in accordance with 1D SBCCC 400.97 (3)*

**I. General Education.** Degree programs must contain a minimum of 15 semester hours including at least one course from each of the following areas: humanities/fine arts, social/behavioral sciences, and natural sciences/mathematics. Degree programs must contain a minimum of 6 semester hours of communications. Diploma programs must contain a minimum of 6 semester hours of general education; 3 semester hours must be in communications. General education is optional in certificate programs.

**II. Major Hours.** AAS, diploma, and certificate programs must include courses which offer specific job knowledge and skills. Work-based learning may be included in associate in applied science degrees up to a maximum of 8 semester hours of credit; in diploma programs up to a maximum of 4 semester hours of credit; and in certificate programs up to a maximum of 2 semester hours of credit. (See second page for additional information.)

**III. Other Required Hours.** A college may include courses to meet graduation or local employer requirements in a certificate, diploma, or associate in applied science program. These curriculum courses shall be selected from the Combined Course Library and must be approved by the System Office prior to implementation. Restricted, unique, or free elective courses may not be included as other required hours.

*Within the degree program, the institution shall include opportunities for the achievement of competence in reading, writing, oral communication, fundamental mathematical skills, and basic use of computers.
**Major Hours**

[ref. 1D SBCCC 400.97 (3)]

**A. Core.** The subject/course core is comprised of subject areas and/or specific courses which are required for each curriculum program. A diploma program offered under an approved AAS program standard or a certificate which is the highest credential level awarded under an approved AAS program standard must include a minimum of 12 semester hours credit derived from the subject/course core of the AAS program.

**B. Concentration (if applicable).** A concentration of study must include a minimum of 12 semester hours credit from required subjects and/or courses. The majority of the course credit hours are unique to the concentration. The required subjects and/or courses that make up the concentration of study are in addition to the required subject/course core.

**C. Other Major Hours.** Other major hours must be selected from prefixes listed on the curriculum standard. A maximum of 9 semester hours of credit may be selected from any prefix listed, with the exception of prefixes listed in the core or concentration. Work-based learning may be included in associate in applied science degrees up to a maximum of 8 semester hours of credit; in diploma programs up to a maximum of 4 semester hours of credit; and in certificate programs up to a maximum of 2 semester hours of credit.

**A. CORE**

Courses required for the diploma are designated with *

### Required Courses:

- **ASM 110** Aerostructure Shop Prac 3 SHC
- **ASM 111** Aero Industry Standards 3 SHC
- **ASM 112** Aero Assembly Methods I 2 SHC
- **ASM 113** Aero Assembly Methods II 2 SHC
- **ASM 210** Computer-Aided 3D Appl 3 SHC
- **ASM 212** Aerostructure Join Mthds 3 SHC
- **ISC 112** Industrial Safety 2 SHC
- **MEC 128** CNC Machining Processes 4 SHC

### Required Subject Areas:

**Structures. Select Composites or Metallic.**

**Composites:**

- **ASM 114** Aerostructure Composites 3 SHC
- **ASM 115** Composite Repair Proced 4 SHC
- **ASM 116** Composite Material Test 3 SHC

**Metallic:**

- **ASM 215** Aero Sheet Metal Struct 5 SHC

**B. CONCENTRATION (Not applicable)**

**C. OTHER MAJOR HOURS**

To be selected from the following prefixes:

- AER, ASM, AVI, BPR, CIS, CTS, ISC, MAC, MEC, NDE, PHY, WBL, and WLD

*Up to two semester hour credits may be selected from ACA.*

*Up to three semester hour credits may be selected from the following prefixes: ARA, ASL, CHI, FRE, GER, ITA, JPN, LAT, POR, RUS and SPA.*
