

STATE BOARD OF COMMUNITY COLLEGES
The State Board of Community Colleges and the
Multiple Pathways to High School Equivalency Course Credit Approval

Request: The State Board of Community Colleges is asked to approve the release of the following courses to College and Career Readiness programs. These courses will then be accessible to all high school equivalency programs through Colleague.

Background: The purpose of the Multiple Pathways to High School Equivalency is to repackage valid academic credit, so an individual may earn a high school equivalency diploma. In 2014 under the direction of President David Johnson of Johnston Community College, an ad hoc committee comprised of community college administrators across the state was convened to study the option of creating an alternative pathway for an individual to earn a high school equivalency credential, rather than by using a single testing instrument or path to completion.

Rationale: The Multiple Pathways to High Equivalency was approved by the State Board of Community Colleges in December 2015. The approval and release of these courses will establish a systemic process to award and document student achievements while providing a standard method in Colleague to manage permanent records and generate transcripts. The transcript for High School Equivalency from Multiple Pathways must be identical across all 58 community colleges. The Multiple Pathways option for earning a high school equivalency diploma is available to individuals based on the same eligibility guidelines as with other Basic Skills programs for persons seeking a high school credential.
