

STATE BOARD OF COMMUNITY COLLEGES

Basic Skills Plus Career Pathway Requests

**Request**

The State Board is requested to approve a new career pathway at Mayland Community College. Colleges provide documentation that the new career pathways align with local workforce demand. Students enrolled in the pathways receive instruction and training that are designed to lead to earning industry recognized credentials and employment. College and Career Readiness staff work with curriculum and continuing education staff in conducting reviews of the proposed career pathways to ensure alignment with approved programs of study and program requirements. Colleges may begin enrolling students upon receipt of notice of State Board Approval.

Basic Skills Plus programs are offered with the goal of providing employability skills, job-specific occupational and technical skills, and basic skills instruction to students who are enrolled at the adult secondary education level. In addition, colleges integrate existing courses and services into the career pathways. These may include career readiness, student support, and developmental education instruction as students pursue their high school diploma or a high school equivalency diploma. Colleges may waive the tuition and registration fees associated with this instruction for eligible students. Career Pathways may be offered through curriculum (CU) or continuing education (CE).
