

**STATE BOARD OF COMMUNITY COLLEGES
Curriculum Program Titles to be Archived**

Request: The State Board of Community Colleges is asked to archive the following curriculum program titles.

Cabinetmaking (Diploma)(D35160)
Geospatial Mapping Technology (A40110)
Invasive Species Management Technology (A20240)
Real Estate Appraisal (A25420)
Recreational Vehicle Maintenance and Repair Technology (Diploma)(D60310)
Small Engine and Equipment Repair (Diploma)(D60280)

Background: Each year colleges are reminded to terminate programs that have not had enrollment in over two years. These program terminations have resulted in six curriculum program titles which no college is currently approved to offer.

Rationale: These curriculum program titles are not currently approved to be offered at any of the community colleges. Prior to submitting the request to archive program titles, System Office staff sent notice to each of the 58 colleges to determine if any college would like to retain any of the programs for future needs. None of the colleges indicated a need for any of the programs and are supportive of the titles being archived.

If a college were to determine a future need for any of the skill sets, they could submit a new-to-the-system program application with an updated curriculum standard.

Archiving the titles will result in the removal of the program titles from the *NC Community College System Catalog* so that only active program approvals will be reflected.
